

To our trusted rDVMs,

Thank you for continuing to trust Oradell Animal Hospital with your referrals. We are truly grateful for our partnership with you and the patients you entrust to our care.

As we look ahead to the future of Oradell, we want you to know that we've been listening. Your feedback matters to us, and we've made thoughtful changes to improve the referral experience and strengthen communication every step of the way.

Here's what's new and improving: A more seamless referral process

We've enhanced our referral workflow by utilizing rVetLink, making it easier to submit referrals, share records, and track patient updates in real time. Our goal is to reduce friction, improve efficiency, and keep you informed without added burden.

Improved communication and transparency

We are focused on clearer, timelier updates throughout the referral journey—from intake to discharge—so you always know where your patient is in their care plan.

Continued investment in specialty care

Our hospital continues to grow with advanced technology, expanded services, and highly trained specialists dedicated to providing exceptional, collaborative care for your patients.

Stronger collaboration, built on trust

We remain committed to working as an extension of your practice. Your insights help guide our improvements, and we welcome ongoing feedback as we continue to refine our processes.

On behalf of our entire Oradell Animal Hospital team, thank you for your partnership and for allowing us to be part of your patients' care. We look forward to continuing to support you—and to growing together in the years ahead. With that in mind, we would love to hear your thoughts, feedback, or ideas on how we can continue to best support you and your team.

Warm regards,

Gail Palminteri, Ken Stockman, and Dr. Dennis Bailey
Board of Directors at Oradell Animal Hospital
